VITERRA - TROCHU

PRESS RELEASE FOR IMMEDIATE RELEASE 11/14/2016

VITERRA, TROCHU, ALBERTA FACILITY TEST BED
FOR INFINITY BELTING LTD. FINGER SCRAPER

In early 2016, Viterra contacted Infinity Belting Ltd. to perform service work at their Trochu, Alberta facility. Viterra was having carryback issues with a Canola conveyor system.

Infinity Belting Ltd.'s answer was our Patented Finger Scraper Belt Cleaner. The carry back is no longer an issue for Viterra because of the patented flicking action of the urethane

Aaron Sjodin and Dan Sanders were very generous in allowing their Trochu facility to be used as a test bed for our solution. Aaron has stated to us that "Since installation, the fingers have had only minimal wear and the system continues to work excellently and its effectiveness and simplicity is appreciated by my maintenance personnel that really do like the system."

The Finger Scraper continues to exceed all expectations and has saved Viterra money in terms of unscheduled maintenance costs.
