## ENVIROLINE - X22 PELLET DEICER

### X22, Environmentally Friendly Ice Melt:

- Works by depressing the freezing point of water (in the form of ice or snow).
- Within 15-20 minutes after application, the X22 becomes active.
- Once the pellets have dissolved, the liquid that is formed, or brine, spreads underneath the ice and snow breaking any bond that has occurred between the concrete or pavement.
- Once the exothermic reaction has occurred, the ice or snow can easily be removed from the surface.
- The X22 can also be applied prior to a snowfall as a preventative measure.
- X22 has an effective temperature range of -32C but remains effective to -50C.
- Environmentally friendly, X22 has minimal effects on plant life. BOD (Biological Oxygen Demand) & LD50 Trout (Lethal Dose 50%) test reports are available upon request
- X22 is not controlled under WHMIS.
